

SISTEMAS DEL CUERPO HUMANO

Aparato locomotor

Sistema nervioso

Aparato excretor

Aparato digestivo

Sistema respiratorio

¿Qué es?

Es un grupo de órganos que intervienen en la respiración.

Principales órganos

boca
nariz
tráquea
bronquios
bronquiolos
pulmones
diafragma
alvéolos

Sistema circulatorio

¿Qué es?

Es un grupo de órganos que intervienen en la circulación.

Principales órganos

corazón
aurículas
ventrículos
vasos sanguíneos
arterias
venas
capilares

BODY SYSTEMS

Locomotor system

Nervous system

Excretory system

Digestive system

Respiratory system

What is it?

It is a group of organs that perform respiration.

Main organs

mouth
nose
trachea
bronchi
bronchioles
lungs
diaphragm
alveoli

Circulatory system

What is it?

It is a group of organs that perform circulation.

Main organs

heart
atria
ventricles
blood vessels
arteries
veins
capillaries
