

MICROORGANISMS

BACTERIA

HELPFUL

Making yoghurt and cheese (*lactobacillus*)

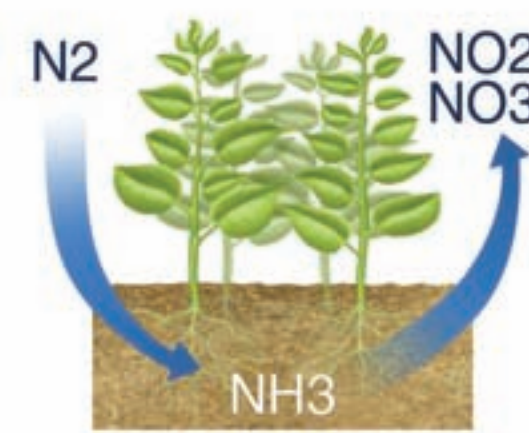

Producing antibiotics (*bacillus*)

Decomposing organic material and recycling nutrients

Fixing nitrogen in soil and returning it to the atmosphere

Helping intestinal activity

HARMFUL

Food poisoning (*salmonella*)

Sore throat (*streptococcus*)

Tooth decaying

FUNGI

HELPFUL

Baking and brewing (yeast)

Producing antibiotics and vaccines (penicillin)

Decomposing organic material and recycling nutrients

HARMFUL

Fruit and bread decaying (mould)

Athlete's food

VIRUSES (A SPECIAL GROUP)

HARMFUL

Flu

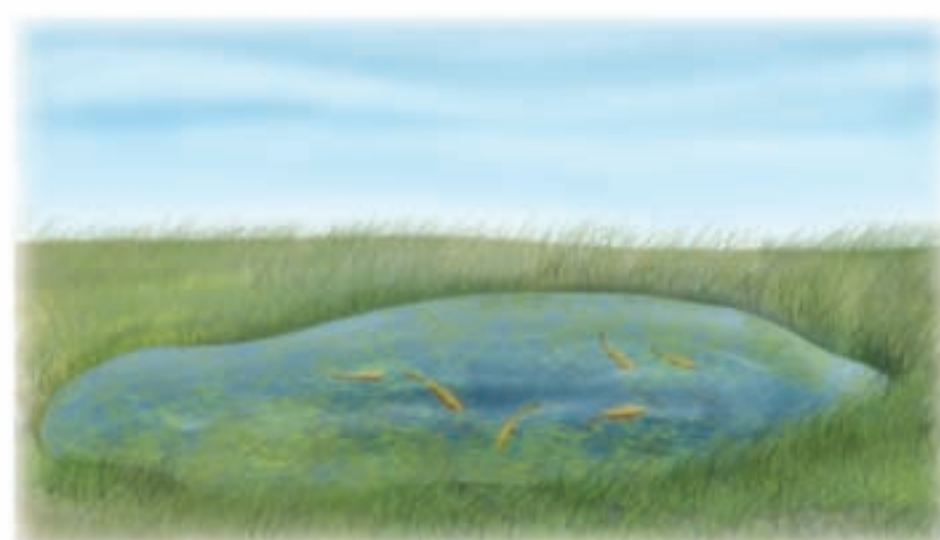

Chicken pox

ALGAE

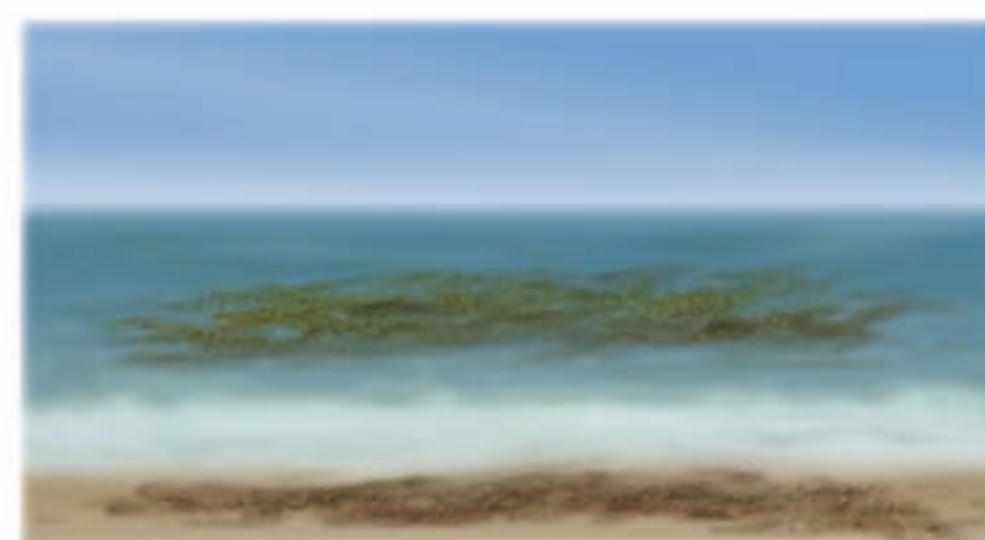

HELPFUL

Oxygen producers

HARMFUL

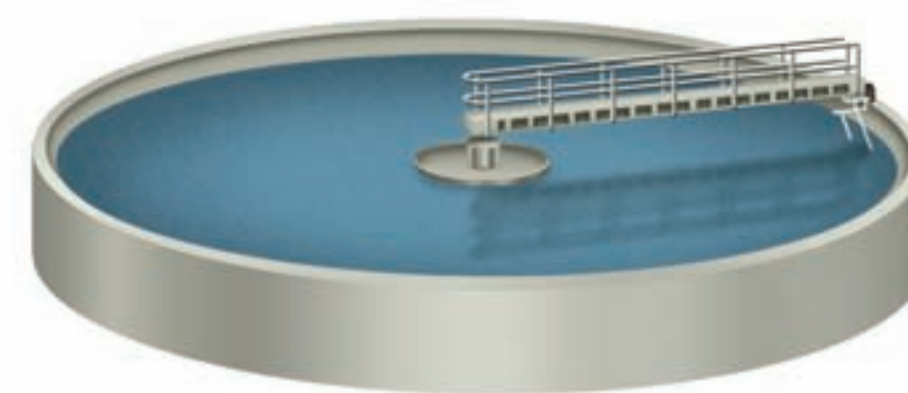

Algal blooms

PROTOZOA

HELPFUL

Sewage treatment (*paramecium*)

HARMFUL

Malaria

Leishmania

HELPFUL

There aren't helpful viruses.
