2 Students' own answers

3 Students' own answers

- 4**
- A: Did you read that article about animals that take medicine when they're ill?
- B: Yes, some chimpanzees eat plants that are used by humans as medicine.
- A: And elephants are known to eat soft rocks to stay healthy.
- B: Yes, the rocks contain sodium, which is needed to neutralise the toxins in their diet.
- A: A lot of animals are thought to have similar instincts.
- B: Animals are known to communicate with each other as well.
- A: Yes, dolphins are said to be very intelligent.
- B: Yes, it is said that they get ill and depressed if they're isolated.
- A: That's right. They are known to need physical contact and social interaction.
